Bachelor of Computer Applications   **May 2017**
Smt. Tanuben & Dr. Manubhai Trivedi college of Information Science | India

Master of Computer Applications   **March 2019**
Jaipur National University |India

Work Experience

Web Application Developer   **June 2022 - May 2023**
Vuggo │ Vancouver, BC
● Developed end-to-end web applications as a Web Developer utilizing PHP/Laravel and MySQL for back-end technology stack, and employing front-end technologies including AJAX, jQuery, JavaScript, Livewire, and CSS, which resulted in supreme results for clients.
● Leveraged Rest APIs, and AWS services (SQS, EC2, S3) to successfully implement innovative features in the admin panel, leading to a notable 25% increase in user satisfaction.
● Improved user experience and engagement by implementing responsive UI design strategies, resulting in a 20% reduction in bounce rate.
● Collaborated in an agile environment to translate client requirements into effective application design by participating in daily scrum meetings and maintaining the best industry standards for development.

Web Application Developer   **Aug 2021 - May 2022**

Codiksh │ Surat, Gujarat, India

● Developed resilient and scalable products/services using PHP (Laravel) and integrated APIs, resulting in optimized systems for high-traffic environments and enhanced performance.

● Engaged with the Project manager to break down high-level requirements into tasks which supported the team to deliver better results and completion of project on time.

● Proficient in PHP Object-Oriented Programming and adept in utilizing frameworks to develop robust and efficient web applications.

● Utilized ReactJS and Tailwind CSS to craft high-quality web applications, delivering exceptional user experiences that significantly increased user engagement and contributed to project success.

Web Application Developer   **Oct 2019 - July 2021**

Unikwork │ Surat, Gujarat, India

● Engineered efficient admin panels for healthcare and entertainment systems, employing Laravel, MySQL, and PHP technologies, resulting in streamlined administrative workflows and decreased reliance on physical documentation.

● Leveraged expertise in WordPress core functions, filters, and actions to construct and sustain WordPress-powered websites and applications, ensuring smooth operation and continuous functionality.

● Elevated a web application's technological foundation by optimizing its data structure and implementing an enhanced MVC architecture, resulting in improved performance and scalability.

Wordpress Developer   **March 2019 - Sep 2019**

Narola Infotech │ Surat, Gujarat, India

● Enhanced performance of WordPress themes using front-end technologies to achieve the best result in terms of performance and design.

● Adapted fundamental knowledge of responsive front-end and back-end development by collaboration and coordination with product managers to enhance existing features and designs.
